# EURO LINES

## PT EUROINDO LINI INDONESIA

Our company was founded in 1996 with a principal objective of facilitating international shipping and logistics trade to deliver a complete shipping & logistic services including sea, air and inland transportation and other expedited freight delivery. The single house that affiliates almost all the services is ran by experienced hands with vast shipping & logistics experience at home and abroad.

We works with a team of qualified and experienced, professionals in the area of marketing and operations to handle all types of shipments. The company is managed and supervised by a well experienced management board.

What makes our services stand out from the rest is our ability to provide in-depth expert knowledge in shipping & logistics and individual geographic markets.

With all these skills and capabilities comes an unparalleled commitment to customer service. We will work hard to understand your needs to develop a productive long term partnership. We believe that by staying close to your business as it grows, we can develop your business in Indonesia to suit your changing needs. That way, we can continue to offer a truly tailor-made suite of services whatever you want to send, wherever you want to send it.

## ISO Tank

Our main goal is to become an integral provider of logistics solution for our customers, based on a robust service culture cultivated in over 20 years of dedication to the logistics and isotanks industries.

We currently serve industries anywhere from the United States, Europe, Mexico, Venezuela, Colombia, Central America, China, Japan, Asia, India, Australia and Caribbean Basin Nations

Our experience and our network of agents and allies allow us to offer transportation and logistics service through different cargo modes as :

- Food and Chemical grades 20ft. SS Tank Container
- 20 ft. flexibags Refrigerated
- Containers Dry Cargo
- container

However, we built our strengths on the commitment to be an end to end service provider for our customer's needs. End to end service implies that we use our knowledge of the regional industry to help customers source their products and to act as the bridge between producers and consumers of the products we transport. As our mission dictates we aim to be a permanent logistics supplier with the highest standards of services, effectively responding to the needs of comprehensive transportation and distribution logistics for the benefit of our customers and shareholders
